

Matt S

Objective:

To work with modern media and put my artistic and computer skills to use.

Qualifications:

I have worked with several 2D and 3D drawing/modelling programs such as Illustrator, Photoshop, Blender 3D, Sketchup, Maya, and Mudbox. I also have experience with VFX, recording, and editing software such as After Effects, Premiere, AVID Pro Tools and Media Composer.

I grew up sketching and painting, learning multiple musical instruments, and writing stories and poetry. I later studied the various histories and philosophies of these art forms and admire artistic qualities found in all varieties of media.

I pay great attention to detail and enjoy capturing realism in my work. Having taken multiple anatomy, physiology, and exercise science courses, I have a working knowledge of the human body and how it moves and functions.
